

Works Notice

December 2023 / January 2024

Roma Street station Subway and Bus Platform Upgrades

In November, the team upgrading the architectural finishes within the Roma Street station subway and busway platform 2 achieved two major project milestones. Tiling works on bus platform 2 were completed, and the platform was partially reopened. Down in the subway, refurbishment activities were completed in the women's toilet.

Throughout December 2023 and January 2024, upgrade works will continue in the subway, weather and construction conditions permitting.

Details of work

Station subway

In early December, hoarding on the eastern side of the Roma Street subway will be removed, revealing new floors, wall treatments and ceilings.

From early December, work areas will be established on the western side of the subway between platforms 10 and 3.

In December, the western stair access to platform 8 and 9 will also be closed. Access to platform 8 and 9 will be maintained via the stairs on the eastern side of the subway and lifts. Signage will be in place to assist customers.

The following activities will be undertaken within the station subway:

- installation of hoarding around work areas
- removal of parts of the ceiling and station subway floor tiles using jackhammers and floor grinders
- refurbishment of platform stairs using jackhammers and floor grinders
- refurbishment of toilets within the subway
- installation of new flooring, wall tiles and new ceiling panels
- installation of temporary flooring
- lighting upgrades.

Works are scheduled to occur between 6:30am and 6:30pm, Monday to Sunday, construction conditions permitting.

Due to operational requirements of Roma Street station and Brisbane Coach Terminal, high impact out of hours work will be undertaken between 6pm and 5am Monday to Saturday and includes activities listed above. Residents may experience an increase in noise levels.

Busway platform 2

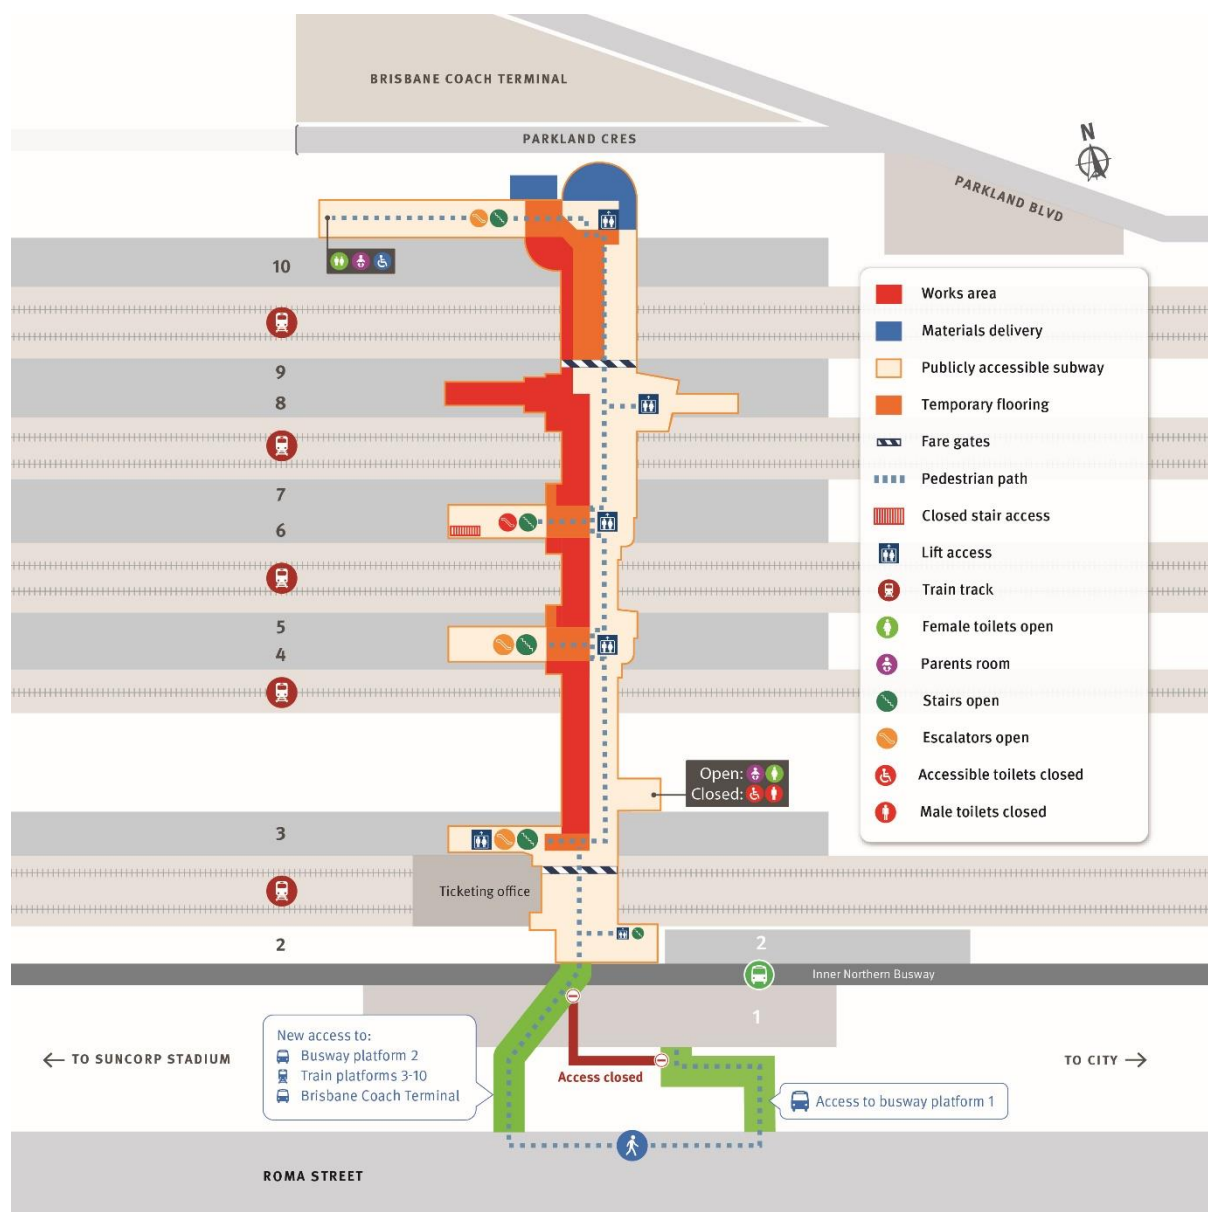

In December 2023 and January 2024, minor finishing works will take place on bus platform 2. Bus services will continue as normal during this time.

Due to busway operational requirements and for the safety of workers, construction will generally be undertaken outside the project's normal working hours, construction and weather conditions permitting:

Monday to Sunday, from 11pm and 5am

- saw cutting to remove and reconstruct platform columns
- installing ceiling of the existing platform canopy
- installing platform tiles
- installing electrical components such as power and lighting.

Deliveries of equipment including machinery and materials via Countess Street busway.

What to expect

During these works, access to platforms, lifts and the subway will be maintained with temporary and intermittent changes to customer access. Customers and the local community may notice an increase in construction activities and workforce, which may generate increased levels of noise, dust and vibration. Mitigation measures will be in place, where possible, to reduce impacts.

There will be intermittent use of concrete saws, jackhammers, grinders, small power tools, minor vibrating equipment, generators, concrete pumps, vacuum trucks and mobile lighting towers to light work areas at night.

Materials and machinery for subway works will be delivered and removed from site between 11pm and 5am via Parkland Crescent. Vehicle access through Parkland Crescent will be maintained under the direction of traffic control.

We appreciate your patience during construction and will continue to update you as work progresses.
