

Works Notice

March 2024

Hope Island station construction update

Acciona Georgiou Joint Venture (AGJV) has been awarded the contract to design and build Hope Island station, with major construction now underway.

Site establishment

Works will be undertaken between 7:00am until 5:00pm Monday to Saturday.

In March, site establishment works are ongoing within the future Hope Island station work area in Mangrove Jack Park.

Works will include:

- General earthworks and construction of temporary piling platforms adjacent to the rail corridor and temporary works area in Mangrove Jack Park
- Relocation of underground utility services
- Installation of temporary site facilities
- Ongoing site investigation works including ground surveys and geotechnical assessments

Piling works

Works will be undertaken between 7:00am and 5:00pm Monday to Saturday.

In February, piling works commenced for the construction of the elevated platform for the future Hope Island station. There will be 50 piles installed over approximately three months using the less impactful bored piling method.

During March, piling will continue on the east and west of the existing rail viaduct.

Works will include the use of piling rigs, cranes, excavators, trucks, concrete trucks and pumps.

What to expect

- Construction activities may generate increased levels of noise, dust and vibration in the area associated with the use of construction equipment and every effort will be taken to keep noise to a minimum
- Comprehensive management plans and onsite controls have been established to monitor and mitigate impacts of construction, such as water carts for dust suppression.
- The use of machinery including graders, excavators, trucks, compaction equipment, vacuum trucks, cranes, chainsaws and mulchers, water carts, drill rigs, and other hand-held tools
- There are pedestrian changes in Mangrove Jack Park, as per the map below
- The temporary site compound will remain in place for the duration of construction and will be reinstated as public parkland at the completion of construction activities
- Increased truck movements and workforce on site.

We appreciate your patience while we work to build the new Hope Island station.

Work area and access changes

Changes to the way you travel

These three new stations on the Gold Coast line will transform the way we travel across South-East Queensland but building them means changes to travel and transport services during construction. Visit TransLink Journey Planner at translink.com.au, call 13 12 30 or download the MyTransLink app to plan your journey in advance.
